Tel: 0845 132 1811

Role Description

Below you will find the role description for Deep Learning Engineer (Natural Language Understanding) Volunteers

Requirements

- Create project proposals for new Deep Learning projects focused on drug discovery for Leukaemia using open and free datasets.
- Develop approved projects within the timeframe specified in the project proposal.
- Create easy to follow, high level Github tutorials.
- Write high level and low level articles for our blog based on our projects.
